

February 21, 2025

2:15 pm - 2:40 pm

Attendees: Gabrielle Kuruvilla, Kacie, Harper, Viet, Thenn

Current Team leader: Gabrielle Kuruvilla

Updates:

- Finalized that web application is the best option for us and our skill sets, rather than mobile application

Meeting:

- Went over progress report
- For next week:
 - frontend - will work on Figma and fixing github access; explore exporting figma designs to code - still leaning towards coding in React so the application is more responsive
 - backend - API research and database setup
- Discussed previous experience with Node - Harper and Viet both have an introductory level of experience
- Next week come up with software architecture diagram - high level design diagram
 - how components will interact with each other; will show the flow of the application
 - upload to github

To Do:

- Take more detailed meeting minutes for Friday meetings
- For progress reports include how many hours each member worked
- Move Team Meeting Minutes into a different folder than the TA
- Upload project proposal to GitHub
- Team Leader update tasks on the kanban board - assign to people and add tasks from previous weeks
