Week: Saturday, 3/8 — Friday, 3/14

Team leader: Harper Wood

- Review of last week's tasks
- New tasks for the next week
- Technical issues/challenges

Harper Wood (Hours worked = 11)
- Tasks completed:
    - Tuesday team meeting (updates, planning)
    - Implemented logic to generate a JSON Web Token when a user logs in successfully
    - Fixed error from making a server side call on the client side
        - Implemented API logic to call server side function to check if the login was successful instead of directly calling the server side function from the client
    - Fixed issue with failed routing from login to dashboard after successful login
    - Implemented logic to protect Dashboard, Expenses, and Profile pages from being viewed if the user is not logged in (using JWT to validate)
        - Redirects to Login if user not authenticated
    - Meeting minutes, progress report, Github projects task management
    - Friday meeting
- Tasks for next week:
    - Integrate Azure receipt API into Expenses page
        - Send receipt to API when uploaded, get results, and populate the proper fields to track the expense
    - Add JWT protections to API calls so they cannot be made without the user being properly authenticated

Gabby Kuruvilla (Hours worked = 9)
- Tasks completed:
    - Working through errors stemming from merge conflicts as back and front end are integrating more frequently
    - Finalizing dummy pages
- Tasks for next week:
    - Begin updating dummy pages to our final figma design

Viet Vu (Hours worked = 11)
- Tasks completed:
    - Fixed issues with database connectivity

- - - Had duplicate connections running at once
    - Fixed issues with limited database entries per session
    - Organized database for further entry types
    - Finished remaining sign up page functionalities
    - Set up login page to query for a user
      - Produces placeholder outputs for user not found, incorrect password, login successful
    - Set up global, secure access to the database
      - Used to only work on my laptop and only in my apartment
    - Cleaned up files and pushed to GitHub
- Tasks for next week:
  - Fix the bug that occurs after a user is submitted to the database
  - Finish routing login page to dashboard
    - Possible bugs with redirecting
  - Work on transaction data and integration with its corresponding page(s)

Kacie Yee (Hours worked = 9)
- Tasks completed:
  - Ported the expenses page and the profile page from inline CSS to its own CSS page
  - Developed temporary front end for expenses page and profile page
  - Cleaned up CSS in the globals.css file and pushed to
  - Ran into trouble with merge conflicts between the gabby branch and the main branch, but worked with Harper to resolve those issues
- Tasks for next week:
  - Finalize our Figma design to prepare to replace dummy pages with nicer UI/UX
